

**ACTION REQUIRED: Protect Your Operating Authority in MOTUS***A message for owner-operators and fleet owners***FMCSA Has Transitioned to MOTUS**

FMCSA launched **MOTUS (Modernized USDOT System)** on **May 14, 2026**. As with any system transitions, delays and processing issues have occurred, **carriers should act now** to keep their information current and avoid disruptions.

WHY THIS MATTERS TO YOUR BUSINESS

Your USDOT profile is your operating identity. Brokers, shippers, insurers, and enforcement rely on it daily to evaluate your business. **Keeping it accurate protects your ability to earn an income.**

If your information is outdated or unclaimed in MOTUS, it can:

- Make your business appear higher-risk
- Misrepresent your CSA scores
- Reduce broker visibility and load opportunities
- Delay updates to drivers, equipment, or MCS-150
- Create underwriting concerns

**WHAT YOU CAN DO****★ TAKE OWNERSHIP OF YOUR DOT PROFILE**

As an owner-operator or business owner, **YOU are the only one who can manage your DOT identity.** It's a core part of running a profitable operation and should be reviewed regularly.

Carriers who actively manage their DOT profile:

- Catch errors before they impact CSA scores
- Stay visible and competitive
- Maintain a clean safety profile
- Keep insurance costs predictable
- Prevent FMCSA from making changes without their knowledge

DON'T LET OUTDATED RECORDS COST YOU LOADS

FMCSA is increasing enforcement around outdated or inaccurate records. **If you're not watching your DOT profile, someone else is — and it may not be in your favor.**

Bottom Line: This isn't just a system update – it affects your **authority, your reputation, and your revenue.**

Act now to keep your trucks moving and keep your business profitable.

Claiming your USDOT in MOTUS now ensures:

- Your business stays visible
- Your safety record is accurate
- Brokers can trust your profile
- Reduce delays during the transition
- You stay in control of your DOT identity and CSA performance
